Knowledge:

Networking & Cibersecurity Cybersecurity monitoring, threat detection and mitigation. Experience hosting public servers on personal network, AWS, OCI, and Azure.

Programming Full-stack development: front-end (Angular, HTML, CSS, JavaScript) and back-end (Java, PHP). Data extraction, manipulation, and analysis in Python (NumPy, Pandas). Integration with relational (MySQL, PostgreSQL, Oracle) and non-relational (MongoDB) databases.

Databases Query writing and optimization in MySQL, PostgreSQL, MongoDB. Development of stored procedures for task automation.

Others: Linux (BASH/ZSH), Git, CI/CD pipelines, Docker, AI concepts and basic ML experimentation.

Work Experience:

2025 Sales Associate - Warehouse Operator MediaMarkt
Advised customers on electronics, assisted in sales, managed stock, and supported warehouse operations to maintain product availability.

2025 Corporate Technical Support Specialist MicroSysCom
Provided technical support for corporate clients, managing system diagnostics, hardware/software deployment, and network reliability, remotely and on-site.

2024-25 Enterprise Cybersecurity Analyst GMV
Monitored security systems, detected and analyzed threats, and contributed to maintaining secure enterprise IT infrastructure for ourselves and our clients.

2024 Senior Data Analyst & Full-Stack Developer ONETS
Rapidly learnt Angular using my full-stack development skills. Autonomously developed a complete web project from provided designs, implementing both frontend and backend components, delivering production-ready solutions in an unfamiliar environment.

2024 Simulation Operator VirtuaStation
Monitored and maintained simulation environments, supported clients, and ensured smooth operation of simulators and VR systems.

2023 VR Operations - Client Support Zero Latency
Managed client sessions and VR system operations. Assisted in maintaining VR hardware/software, troubleshooting in real-time, and ensuring seamless user experiences.

2022 Cybersecurity Analyst Leroy Merlin
Led employee access control project, designing and implementing security policies to safeguard internal systems.
